

LA PORTA DOCCIA VÉNUS

Istruzioni di installazione

Informazioni generali

Nota: il vetro di sicurezza non può essere rilavorato.

Leggere attentamente queste istruzioni prima di iniziare l'installazione.

- Prestare particolare attenzione durante la foratura delle pareti, per evitare di danneggiare tubi o cavi elettrici nascosti.

Ispezionare il prodotto al momento della consegna per verificare l'eventuale presenza di danni da trasporto, imballaggi o componenti mancanti oppure difetti di fabbricazione. I danni segnalati successivamente non potranno essere presi in carico.

Maneggiare il prodotto con cura, evitando urti e impatti su tutte le superfici e sui bordi del vetro.

- Nota: questo prodotto è pesante e richiede due persone per l'installazione.

Manutenzione e pulizia

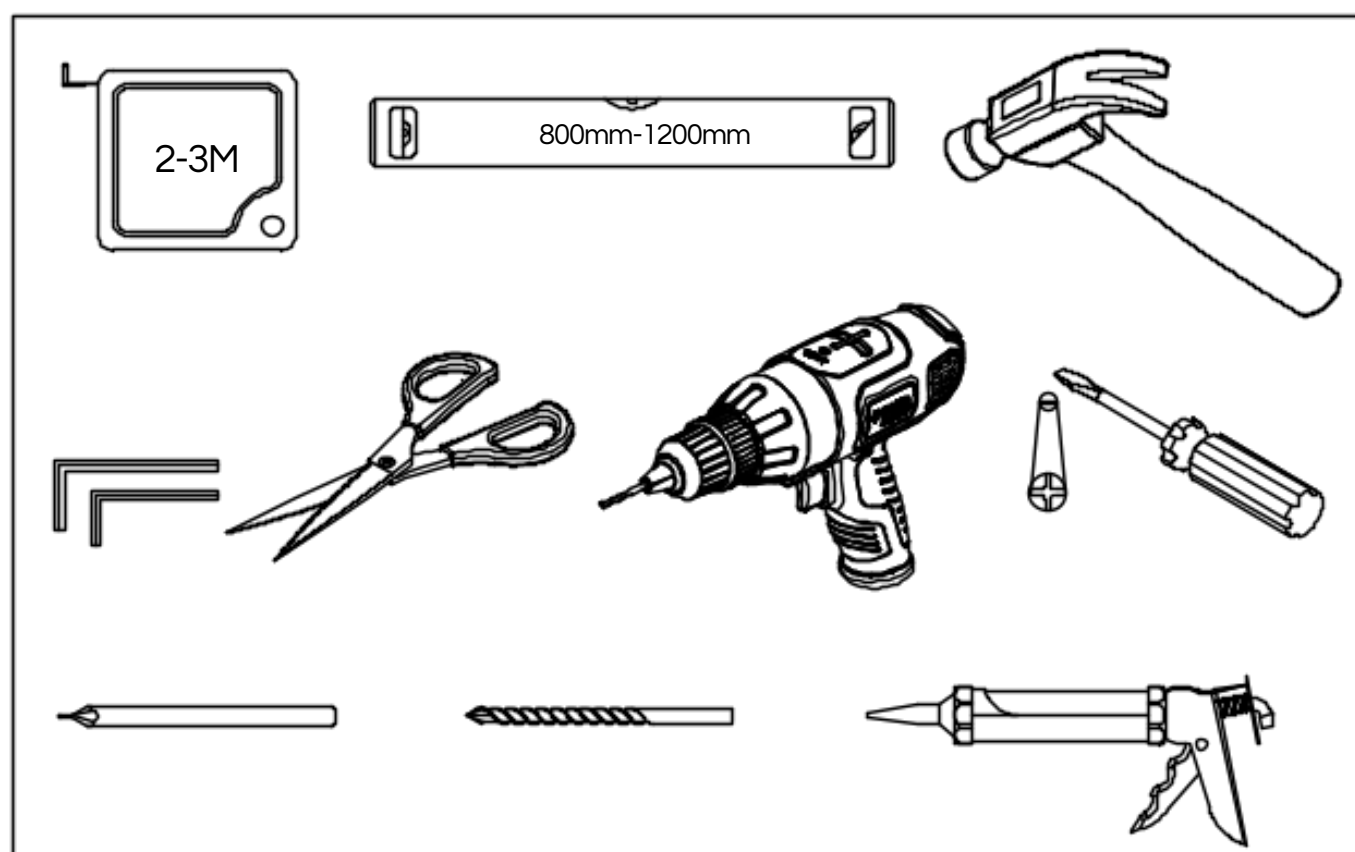

In generale, per pulire l'intera cabina doccia è sufficiente utilizzare un panno morbido e umido.

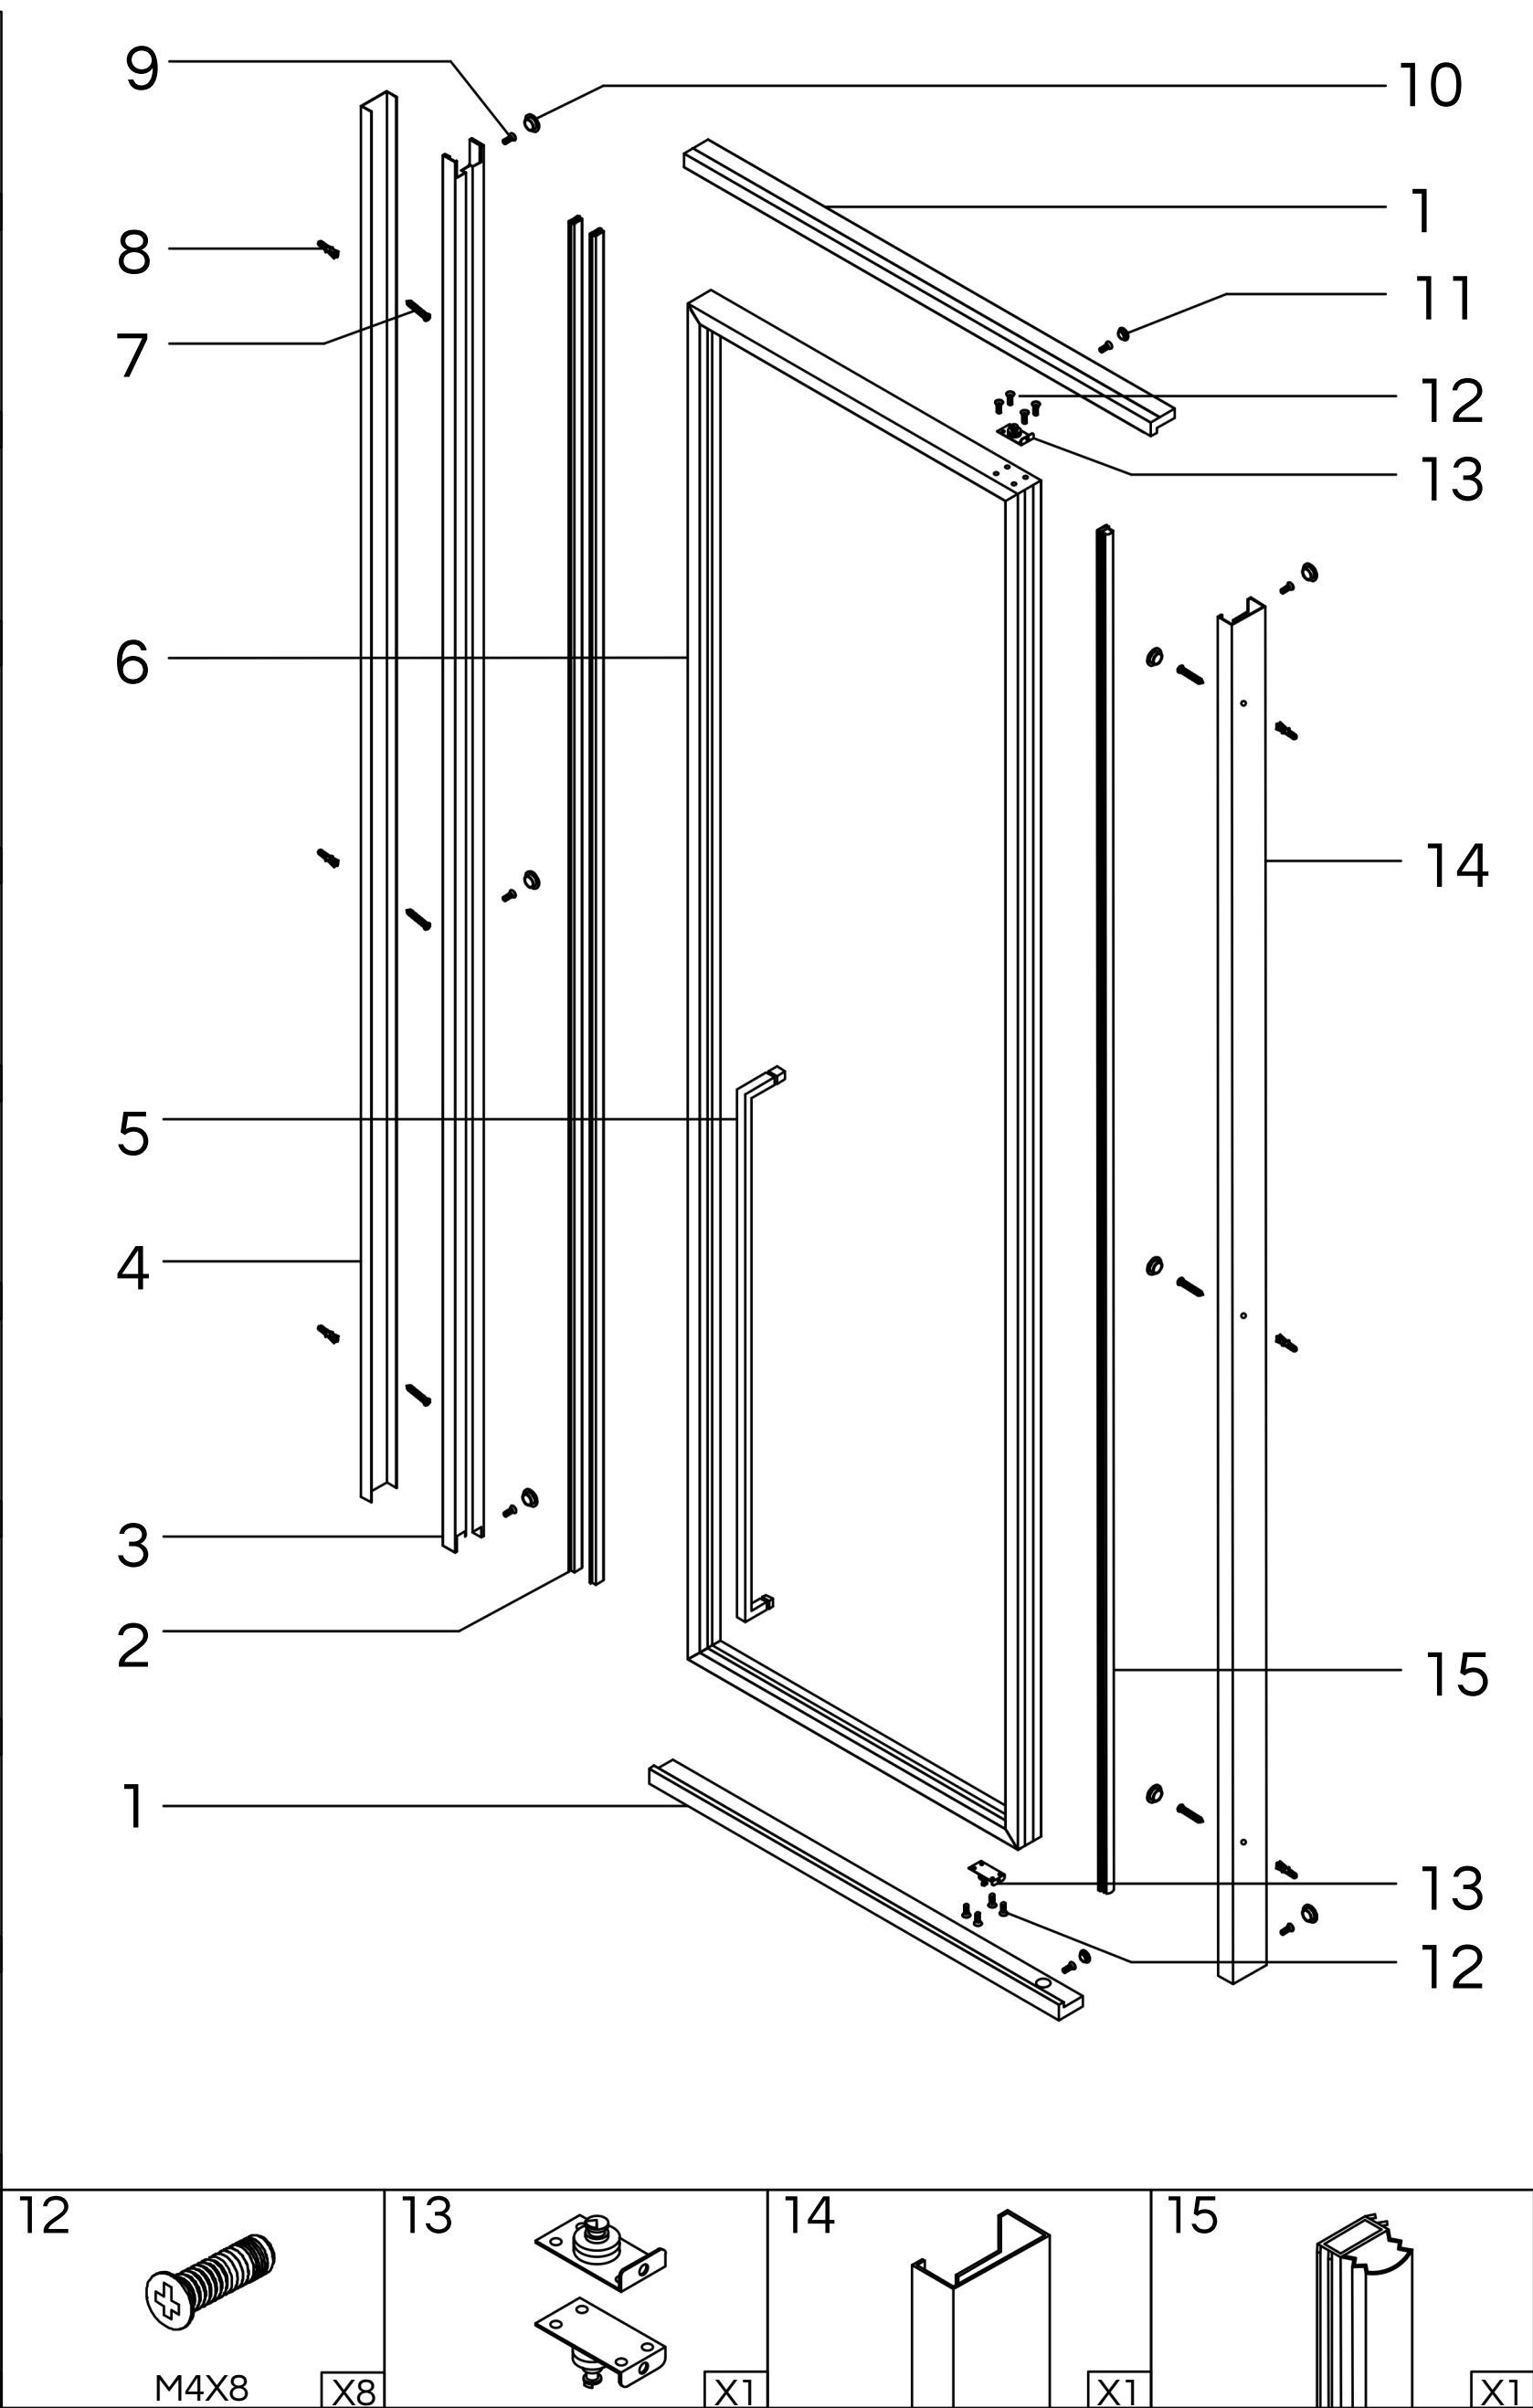

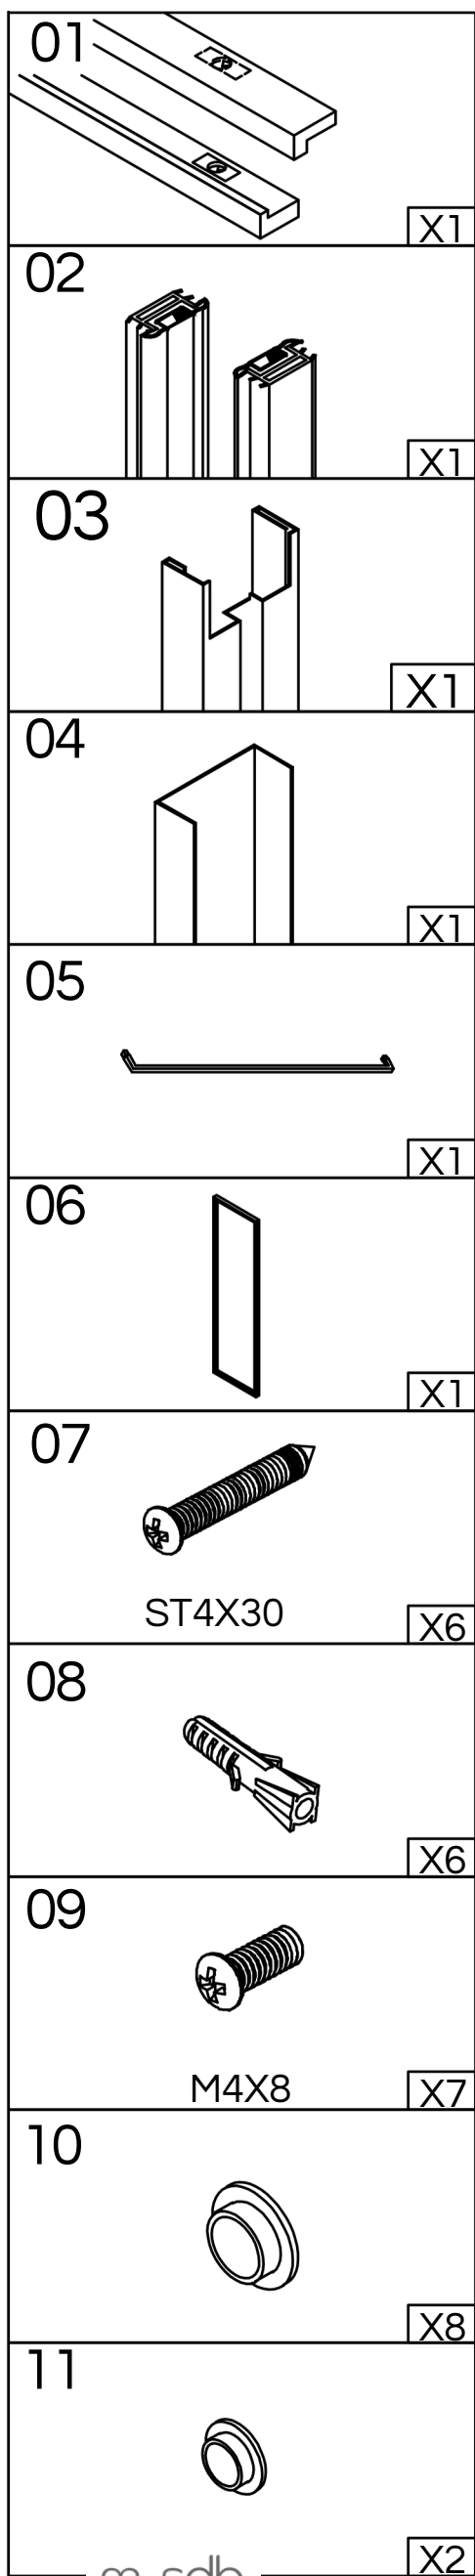

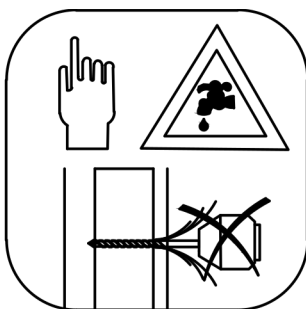

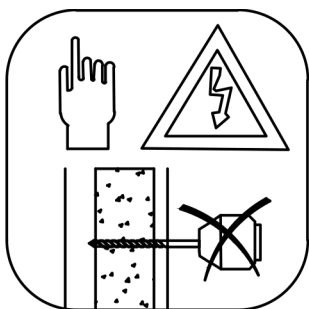

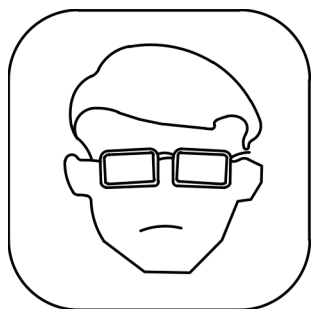

Non utilizzare detergenti aggressivi, come alcol, benzina, detergenti per sanitari o altre sostanze solventi.

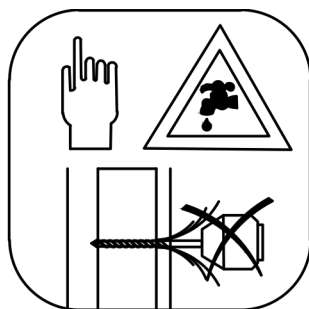

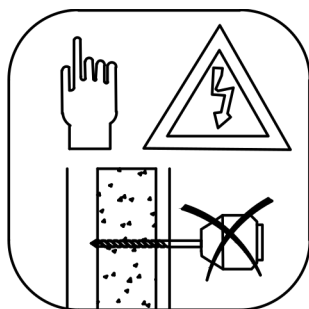

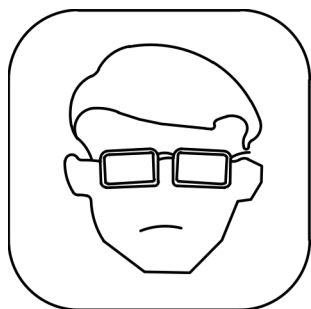

Per le macchie ostinate, utilizzare un panno di cotone con detergente neutro, quindi risciacquare con acqua pulita.

Per evitare graffi, non utilizzare oggetti duri o appuntiti, come una spazzola metallica, per pulire la cabina doccia.
